

Local traffic and weather reports available through my XM satellite radio have made life easier on a daily basis. My local FM station doesn't offer the quality (nor quantity) of traffic and weather reports I get from satellite radio. This is one of the reasons I pay for the service...not to mention the variety of music and talk channels available. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support satellite radio. Satellite radio provides me with a service I cannot get anywhere else. It's unique programming is awinspiring and if terrestrial radio could compete by stepping their game up, I might be more inclined to listen to AM and FM radio. Until then, I will exclusively listen to the radio that's worth every penny I pay...satellite radio.

Thank you,
Rachel Bulla
